

After carrying out an in-depth product performance analysis, we have decided that **now is the right time to streamline our product selection.**

We have made this decision based on our desire to stock more of the products you love, space for which is currently being occupied by less-desired products.

It is with careful consideration that we now mark the below products for discontinuation.

Please note, for PLA & PETG lines, we will have a 750g alternative available wherever a 1kg variant is removed.
